Service tools

List of Service Tools

The table below gives a short overview of service tools that can be used for testing, error analysis and repair of product , refer to various concepts.

	AD-23FS	Flash adapter	0780391
	AD-23FS has the following features: • Provides galvanic connection to terminal test pads • Provides standardized interface towards Control Unit • Provides RF connection using galvanic connector or coupler Multiplexing between USB and FBUS media, controlled by Vusb		
	CA-35S	power cable	0730327
	The power cable CA-35S is used to power up the interface adapter SS-46.		
	CU-4	Control unit	0770831
	CU-4 is a general service tool used with a module jig and a flash adapter. CU-4 requires an external 12 V power supply. The unit has the following features: • software controlled via USB • EM calibration function • Forwards FBUS/Flashbus traffic to/from terminal • Forwards USB traffic to/from terminal • software controlled BSI values • regulated VBATT voltage • 2 x USB2.0 connector (Hub) • FBUS and USB connections supported

DKU-2	USB connectivity cable	0730238
USB to Pop-Port™ connector cable.		

FPS-10	Flash prommer	0080321

FPS-10 interfaces with:

- PC
- Control unit
- Flash adapter
- Smart card

FPS-10 flash prommer features:

- Provides flash functionality for BB5 terminals
- Smart Card reader for SX-2 or SX-4
- Forwards USB traffic through it
- Provides USB to FBUS/Flashbus conversion
- Provides LAN to FBUS/Flashbus and USB conversion
- Vusb output switchable by PC command

FPS-10 sales package includes:

- FPS-10 prommer (0770503)
- Power Supply with 5 country specific cords (0675525)
- USB cable (0730322)

JBT-9	Bluetooth test and interface box (sales pack)	0081490

The JBT-9 testbox is a generic device to perform Bluetooth bit error rate testing and doing cordless FBUS connection via Bluetooth. An ACP-8x charger is needed for BER testing and AXS-4 cable in case of cordless testing interface usage.

- JBT-9 testbox (0770336)
- Installation and warranty information (9360613)

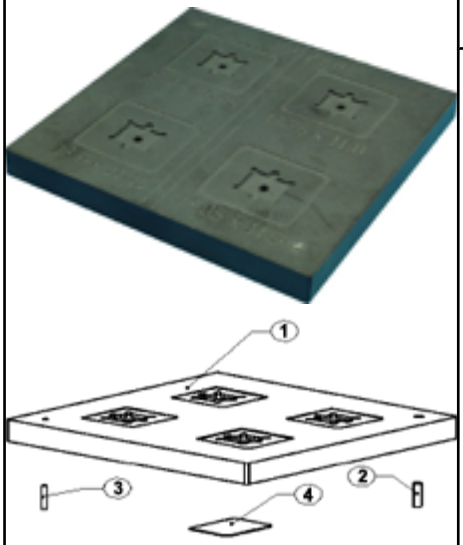
MJ-26	Module jig	0770833

MJ-26 is meant for component level troubleshooting.

The jig includes an RF interface for GSM, WCDMA and Bluetooth. In addition, it has the following features:

- Provides mechanical interface with Engine module
- Provides galvanic connection to all needed test pads in module
- Multiplexing between USB and FBUS media, controlled by Vusb
- UI test interface
- MMC interface
- Duplicated SIM connector
- Audio components: IHF, MIC, earpiece
- Connector for control unit
- Access for Pop-Port™ system connector

Note: In the picture CU-4 is connected to MJ-26 . CU-4 is not part of the MJ-26 sales package and has to be ordered separately.



MJS-76	LGA rework jig	0770417

This tool is used in LGA type component reworking purposes in central service centers.

Parts list:

Part number	Part name	Material code	Drawing number	Qty
1	Frame		SME5S910	1
2	Cylindrical pin 3 x 12	640b003		1
3	Cylindrical pin 3 x 12	640B012		1
4	Type label	9380601		1

PCS-1	Power cable	0730012

The PCS-1 power cable (DC) is used with a docking station or a module jig to supply a controlled operating voltage.

	PKD-1	SW security device	0750018
	SW security device is a piece of hardware enabling the use of the service software when connected to the parallel (LPT) port of the PC. Without the device, it is not possible to use the service software. Printer or any such device can be connected to the PC through the device if needed. **Caution:** Do not connect the PKD-1 to the serial port.		
	RF shield box	RF shield box	N/A
	Because the WCDMA network disturbs the RX side testing of the WCDMA phone and the Tx signal of the WCDMA phone can severely disturb the WCDMA network, a shield box is needed in all testing, tuning and fault finding which requires WCDMA RF signal. The shield box is not an active device, it contains only passive filtering components for RF attenuation.		
	RJ-48	Rework jig	0780365
	RJ-48 is a soldering jig used for soldering and as a rework jig for the engine module.		
	SA-64	RF coupler	0780409
	SA-64 is a coupler for WCDMA / GSM RF testing. It is used together with AD-23FS flash adapter.		
	SES-3	Stencil	4350383
	SES-3 stencil is used with MJS-76 / 0770417 and it supports the PA component. SES-3 is made for reworking purposes used in central service level.		
	SS-15	Camera removal tool	0770755
	The camera removal tool SS-15 is used to remove/attach the camera module from/to the socket on the phone PWB.		

Copyright © 2004 Nokia. All Rights Reserved.

	SS-46	Interface adapter	0780510
	SS-46 acts as an interface adapter between AD-23FS adapter and FPS-10.		
	SX-4	Smart card	0780392
	SX-4 is a BB5 security device used to protect critical features in tuning and testing. SX-4 is also needed together with FPS-10 when DCT-4 phones are flashed.		
	XCS-4	Modular cable	0730178
	XCS-4 is a shielded (one specially shielded conductor) modular cable for flashing and service purposes.		
	XRF-1	RF cable	0730085
	The RF cable is used to connect, for example, a module repair jig to the RF measurement equipment. SMA to N-Connector ca. 610mm. Attenuation for: • GSM850/900: 0.3+-0.1 dB • GSM1800/1900: 0.5+-0.1 dB • WLAN: 0.6+-0.1dB
